

Saeed Hussain

Full Stack Engineer & AI Engineer

saeedbarcha77@gmail.com | +92 3554356393 | Gilgit-Baltistan, Pakistan | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack and AI Engineer experienced in building scalable SaaS products, AI-assisted workflows, REST APIs, and data-driven web applications. Strong hands-on background in JavaScript, React, Next.js, Node.js, Express.js, NestJS, MongoDB, PostgreSQL, Docker, AWS, LLM applications, Agentic AI, RAG, LangChain, prompt engineering, and vector databases. Experienced owning features end-to-end, integrating AI into business workflows, improving application reliability, and resolving production issues.

TECHNICAL SKILLS

Languages: JavaScript, Python, C, C++

Backend Engineering: Node.js, Express.js, NestJS, REST APIs, JWT, OAuth, third-party API integration

Frontend Engineering: React.js, Next.js, Redux, Context API, React Hooks, HTML5, CSS3, Bootstrap

Cloud & DevOps: AWS, Docker, Git, GitHub, GitLab, NPM, Yarn, Netlify, Render, Production Support

Databases & Data: MongoDB, Mongoose, PostgreSQL, Sequelize, Pinecone, Data Modeling

AI & Automation: OpenAI API, LLM Applications, Agentic AI, RAG, LangChain, Prompt Engineering, Vector Search, AI Chatbots

Engineering Practices: API Development, Authentication, RBAC, API Security, Debugging, Performance Optimization

PROFESSIONAL EXPERIENCE

Full Stack Engineer & AI Engineer, HeyCarla

08/2024 - 08/2026 | Remote | Germany-based AI-powered healthcare SaaS

- Developed and maintained full-stack product features using React.js, Node.js, Express.js, MongoDB, REST APIs, and Docker across an AI-powered healthcare SaaS platform.
- Owned features end-to-end, from requirements analysis and data modeling through API design, UI implementation, validation, debugging, and deployment support.
- Integrated LLM, LangChain, and RAG capabilities into healthcare workflows, including smart search, summaries, conflict detection, availability suggestions, automated reports, and AI-assisted email/document generation.
- Improved authentication, role-based access, API security, error handling, application performance, and production stability across core platform modules.

AI Engineer & Full-Stack Developer, Arilect Solutions

2019 - Present

- Develop AI chatbots and RAG solutions by integrating LLM capabilities with MERN and PERN full-stack applications.
- Build React interfaces, Node.js/Express.js APIs, MongoDB/PostgreSQL data layers, authentication flows, and third-party integrations.
- Create LangChain pipelines and vector-database workflows for retrieval-based AI experiences, automation, and production-ready application features.

EDUCATION

Bachelor's in Software Engineering, Karakoram International University

2022

Intermediate, National College of Computer Science, affiliated with Karakoram International University

2017

Matriculation, Aga Khan Diamond Jubilee Model High School, Rahimabad

2015

TECHNICAL PROJECTS

AI-Powered Workforce & Healthcare SaaS, HeyCarla

08/2024 - 08/2026 | Production SaaS Platform

Project: <https://dev.usecarla.de/admin/login>

- Developed an AI-powered workforce and healthcare SaaS product using LLMs, LangChain, RAG, React, Node.js, Express.js, and MongoDB.
- Built modules for employees, clients, patients, bookings, vacations, sick leave, timesheets, invoices, approvals, notifications, reports, and role-based access.
- Implemented smart data search, conflict detection, summaries, availability suggestions, automated reports, and AI-assisted email/document generation.
- Automated administrative workflows and supported adoption by healthcare agencies and enterprise users across Germany.

AI Engineer & Full-Stack Developer, Eldrin AI

07/2025 - 05/2026 | AI-Powered LinkedIn Content Platform

Project: <https://www.eldrin.ai/>

- Built and enhanced an AI platform for LinkedIn content creation, optimization, scheduling, and content management.
- Developed AI features using LLMs, Agentic AI, LangChain, prompt engineering, and automation for content generation, personalization, trend recommendations, insights, and workflow orchestration.
- Connected full-stack user workflows with AI pipelines to improve content quality, streamline publishing, save users time, and support consistent LinkedIn engagement.

Full-Stack Developer & AI Integration, Plex Medical

09/2022 - 08/2024 | Medical App Dashboard | MERN Stack

Project: <https://plex-medical.com/about>

- Developed a MERN-stack medical dashboard for visualizing ECG signals and patient-related data through interactive graphical views.
- Built CSV upload and manual data-entry workflows, connected the application to AI-based analysis, and displayed model responses through charts and dashboard visualizations.
- Implemented React, Node.js, Express.js, and MongoDB functionality to support data input, analysis workflows, reporting, and responsive medical dashboard experiences.

Full-Stack Developer, Equipmates

02/2024 - 08/2024 | Equipment Maintenance & Work Order Management Platform | Next.js & NestJS

Project: <https://getequipmate.com/>

- Developed Equipmates using Next.js and NestJS for scheduling equipment maintenance and managing work orders efficiently.
- Built streamlined workflows for maintenance planning, work-order creation and tracking, reducing manual coordination and improving operational visibility.

ATS KEYWORDS

JavaScript, React.js, Next.js, Node.js, Express.js, NestJS, MongoDB, Mongoose, PostgreSQL, Sequelize, REST APIs, MERN, PERN, Docker, AWS, Git, JWT, OAuth, RBAC, SaaS, OpenAI API, LLM Applications, Agentic AI, RAG, LangChain, Prompt Engineering, Workflow Automation, Pinecone, Vector Databases, AI Chatbots, Medical Dashboard, ECG Data Visualization, Equipment Maintenance, Work Order Management, Full Stack Development, Backend Development, API Development
